TB0006 Electrical Colour/Number Codes

Date: 04/02/99

Due to continuous product improvement the change from multi-core colour electrical wiring cable to number-coded cable has been introduced. A number / colour code has been put in place to allow cable refits in the field and to set in place a reference standard.

The following is the standard code.

NUMBER	COLOUR
1	White
2	Purple
3	Brown
4	Blue
5	Grey
6	Pink
7	Red
8	Orange
9	Light Brown
10	Green
11	Yellow
Green/Yellow F12	Black

Some 12 core cable has a green with yellow trace for wire #12
