

TB0016 SB360 Top Arm Cylinder Module Pipes

Date: 11/09/00

As from serial number **SB6637** STEELBRO MK6 Sidelifters have the Top Arm Cylinder pipes from the PVG valve into the module trough are now in one length of pipe (no joiners).

In the HC Kit Hydraulic Pipes under PVG 32 Valve:

Module	Was:	Replaced with:
Top Arm Cylinder Module pipes Left Hand Module	L3-T/A,B + L15-T/A,B L4-T/A,A + L14-T/A,A	L3-S/E,B L4-S/E,A
Top Arm Cylinder Module pipes Right Hand Module	R3-T/A,A + R3-T/A,A R4-T/A,B + R4-T/A,B	R3-T/A,A R4-T/A,B

This is not a part number for spare parts; it is how the pipes are identified under the kit part number. Therefore quote the kit number first then the pipe identity.
