

## **TB0024 SB360-SB300-330 Fitting Change**

Date: 09/11/01

As from serial number **SB6805** STEELBRO SB360, SB300 and SB330 Sidelifters will be fitted new model of hydraulic fitting called EO-2 supplied by Enzed.

There is one exception to the above start of the EO-2 and that unit is SB 6788.

If replacing a fitting for the EO metric a EO-2 can be sent in place because the body will fit both models, making it unnecessary to stock both models.
