

TB0027 Introduction of E40

Date: 23/04/02

The first E40 produced was SB 6785.

All E40 units after this have changes in the following areas.

- This unit was supplied with a Hyspec Tandem pump, therefore pressure and suction hoses are different from all future unit due to the pump change.
- The energy chain set up is different in that the length is made up of aluim also to reduce the require length at the front chain.
- This unit has the old style air throttle and stop.

PM-21674 Throttle

PM-22143 Stop.
