

TB0032 Standardisation of Chain Slings for SB330/360

Date: 16/07/04

Model SB330/360 STEELBRO Sidelifters now use the same chainsling. The chainslings available for these sidelifers now are:

Kit Number	Description
LF-25820	Chainsling SB330/360 20mm lugs & shorteners
LF-29244	Chainsling SB330/360 20mm lugs no shorteners

This change came into effect on the 16/07/2004 and all SB360/330 models after (not including) serial number SB7381 will be fitted with the new chainslings. The chainslings are the same length as currently used on the SB330, therefore they allow picking up of one 20', 9.6' high container, off a skeletal trailer loaded with 2 x 20' containers.

This change is detailed in engineering change notice, EC-657.
