

## **TB0037 re: Chain Shorteners for 20mm Chain on SB360**

Date: 21/10/05
----------------

This information applies to all SB360 units since SB7381 (July 2004) that have 20mm chains (see Technical Bulletin 0037 re 16mm chain)

This qualifies EC-657 and Technical Bulletin 0032.

When using 20mm Chain Shorteners with the SB360, it is necessary to loop the 17th chain link into the shortener, as opposed to the 13th for the SB330.
