

TB0062 New VIN Configuration

Date: 16 Jan 08	Engineering Dept	TB0062	Cross Ref: D1013
-----------------	------------------	--------	------------------

Due to the increase in Steelbro's productivity, we are now classified as a company that produces over 500 units per annum.

This involves a change in VIN number configuration. The new VIN format complies with both North American and ISO requirements.

This affects ALL units across all models and markets delivered in 2008 and beyond.

Please note that the three character prefix has changed from 7A9 to 7AS. This is an easy way to tell the new from the old.

	World Manufacturer Identifier			Vehicle Attributes						Vehicle Identification								
Digit #	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	
Example VIN	7	A	S	S	S	1	4	3	0	7	A	4	0	8	0	7	3	
Defines	Region	Country	Manufacturer	Type of trailer	Type of Body	Length		No of Axles	Check Digit	Year of Production	Plant	Gross Vehicle Mass	Serial No.					
Type of Content N= number T=text	7	A	S	T*	T	N*	N	N	N	T	T	N	N	N	N	N	N	
Notes	Allocated to Steelbro NZ by SAE					Rounded to nearest metre				2007=7 2008=8 2009=9 2010=A 2011=B		eg: 0-10t="0" 10-20t="1" 20-30t="2"	"0" until serial number "10000"					

*N= Number (Single digit) T= Text (single capital letter) Note letters I, O and Q not allowed in VIN
