

Hetronic to HBC Vendor Change Technical Bulletin

Description

The supplier of radio remote controls for Steelbro Sidelifters has changed from Hetronic to HBC Radiomatic.

Models and Markets

The changes commence for digital units from SB8631. Commencement for the analogue units will occur once current analogue stocks of the Hetronic units have been utilized. A revised technical bulletin will be issued to advise when this occurs.

BOM

EL-32901 SMARTlift Hetronic Radio Remote, is now, EL-39924 Remote Radio SMARTlift HBC
EL-34386 SMARTlift Hetronic Cable Remote, is now, EL-39925 Remote Cable SMARTlift HBC
EL-33214 Series 3A Hetronic Radio Remote, is now, EL-39926 Remote Radio Series 3A HBC

Backward Compatibility

SMARTlift HBC Radios cannot be used on Sidelifters prior to SB8631 unless they have a software upgrade to at least v3.44.

Series 3A HBC Radios are fully backwards compatible.

Use Instructions

The operation of the new radios is identical to the old ones

Benefits and Advantages to Change

The purpose of the change is to improve reliability of Sidelifter control systems
