

Change in Smartlift Display Version.

Description

The current model of Smartlift display is obsolete. The new version has identical form, fit and function but requires new software for operation.

The part numbers and software required are shown in the table:

Model	Part number	TOS Version	Software Required
Old model	AT 3020C1A00-A5B2G2	191	Old software Rev A,B,C Or new SW part number 1xx
New Model	AT 3020C1A00-A5A4B0	393	New SW part number 2xx

Note: The TOS is the display operating system. The version can be viewed on the display during boot up.

Models and Markets

All Smartlift and Digital controlled units from SB9000 onwards.

Installation

There is no change in reprogramming units in the field.

Units in the field do not need to be upgraded.

Download the software as per “SL0003 Updating LCD Display Pages V2”

Backward Compatibility

All SW prefixed programs 2xx and onwards are **NOT** reverse compatible with the older model displays.
